## SPECIALIST IN INFANT FORMULA NUTRIENT ANALYSIS

For you as an infant formula producer it is essential to know that your products are both legally compliant and in agreement with your own label claim. In this process, faster turnaround times play an increasingly important role.

Our team is highly specialized in nutrient analysis in infant formula and related products. We are able to deliver first-time-right results – thanks to true duplicate analysis - with fast turnaround times, and high delivery reliability.

At TRISKELION we are proud of our highly-trained people using state-of the-art analytical facilities and equipment. This enables us to perform analytical research and method development at the highest level as well as accurately analyze large numbers of samples on a daily basis.

## SPECIALIST IN INFANT FORMULA NUTRIENT ANALYSIS

Trusted results for full-label testing in infant formula

Label claim compliance requires fast and accurate analytical data. Many producers and developers of infant nutrition and premixes for infant nutrition rely on TRISKELION for analytical support. Why?

- We offer a complete package for nutrient analysis, including all vitamins, amino acids, fatty acids, macro nutrients, trace elements and minerals
- We know infant nutrition and how it is produced, so this ensures that we do not merely supply analytical data, but we help you to understand the background of analytical results and the consequences for your product quality or production process
- Our fast turnaround times are designed to support your needs
- You can directly contact our experts to discuss your needs or results at any time and, of course, we will contact you if there are unexpected or out-of-spec results

TRISKELION offers testing and consultancy services to clients active in the food, feed, (agro)chemical and pharmaceutical industries. Our goal is to help develop products that improve the health and wellbeing of your customers.
